**Professional Summary**

Proactive and creative Mobile Developer with over 5 years of software development experience, including more than 3 years specializing in Dart and the Flutter framework. Proven track record of architecting and deploying complex, high-performance applications, including Video on Demand (VOD), Over-The-Top (OTT), and secure Virtual Private Network (VPN) platforms. Passionate about translating intricate UI/UX designs into pixel-perfect, responsive digital experiences. Adept at implementing clean architecture, advanced state management, and comprehensive automated testing. Excited to bring my technical expertise and innovative mindset to Somnio Software to build world-class, 100% Flutter-focused solutions.

**Technical Skills**

Languages: Dart, JavaScript

Frameworks & SDKs: Flutter, Native Platform Integration (Android/iOS basics)

Architecture & State: BLoC, Riverpod, Provider, Clean Architecture

UI/UX Implementation: Pixel-perfect translation, Custom Widgets (advanced AppBars, custom-shaped Cards), dynamic Stateful widget optimization.

Tools & Integration: RESTful APIs, Git version control, CI/CD pipelines

Testing & Quality: Automated Testing (Unit, Widget, Integration), Performance Profiling, Troubleshooting

**Professional Experience**

Lead Flutter Developer | Micro Win Solutions (Independent Contracting)

April, 2024 – Present

Spearhead the end-to-end architecture, development, and deployment of complex Flutter applications, specializing in high-demand VOD, OTT, and custom VPN solutions.

Translate intricate wireframes into pixel-perfect interfaces, writing highly customized UI components (including complex `AppBar` configurations and custom-shaped `Card` widgets) to ensure a premium user experience.

Implement clean architecture principles utilizing state management solutions like Riverpod and BLoC to ensure seamless data flow, application scalability, and maintainability.

Integrate secure, high-throughput RESTful APIs and third-party web services for seamless media streaming and secure network routing.

Conduct rigorous automated testing, including unit, widget, and integration tests, ensuring maximum application stability across diverse device footprints.

Manage deployment processes, utilizing CI/CD pipelines to streamline updates and maintain performance standards.

Web Developer | Freelance

December, 2021 – present

Architected and built dynamic, high-performance portfolio websites.

Integrated sophisticated web animations utilizing JavaScript and libraries like anime.js to create immersive, world-class digital experiences.

Designed and executed digital growth strategies, including comprehensive YouTube automation setups, SEO optimization, and strategic client acquisition campaigns.

Mobile Application Developer | Subbig.com

Feb, 2025 – March, 2026

Developed and maintained dynamic mobile applications, optimizing performance and responsiveness using Flutter and Dart best practices.

Collaborated closely with design teams to ensure mobile UI/UX principles and patterns were strictly adhered to during the development lifecycle.

Authored clean, reusable code and participated in mandatory code reviews, ensuring team-wide adherence to modern coding standards.

Conducted deep troubleshooting, debugging, and performance profiling to eliminate bottlenecks in legacy applications.

Assisted with native platform development (Android/iOS) for specialized module integrations when required.

**Education**

Professional Certificate for Software Engineering

SQI College of ICT, 2026.

## Additional Qualifications

Version Control: Expert in Git branching, merging, and collaborative repository management.

Continuous Learning: Constantly evaluating the latest Flutter/Dart ecosystem developments, packages, and best practices to incorporate modern technologies into active projects.
